

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

THere having been lately Proposed by Subscription, Mr *RAT*'s third and last Vol. of his *HISTORY* of *PLANTS*, whereby that whole Work is compleated, containing more Plants, and Description of new *Species*, than all the Books yet extant on that subject; many hundreds being communicated from the Streights of *Magellau*, the *Philippine Islands*, and several Countries never searched of Plants before. By *F. Georgio Camelli* and other *Virtuosi*, who either reside, or have made careful remarks in the respective places; all disposed in an easy method, to be found by their Tribes and Characteristicks; with an account of such parts of them as are either Specificks for some Diseases, as the *Peruvian Bark*, &c. or are Universal Medicines, as *Faba St Iguatij*, &c. beside many peculiarities belonging to particular Plants, every where occurring in the Work. The same is already far advanced at the Press, and will be finished about the 25th day of *March* next, by the Undertakers *SAM. SMITH* and *BENJ. WALFORD*, Printers to the Royal Society, at the *Prince's Arms* in *St Paul's Church-yard*.
